“OGRES”

RELEASEDATE September 25, 2026 – DIGITAL

FORMATO	CAT. No.	UPC	GENERI
DIGI	KGRDIGI08	5050580875227	Deep Groove Funk Psychedelia

Killer Groove Records presents "Ogres", the second single from Electric Circus' upcoming album *Rites*, due for release on November 27. A dark, deep-groove march that gradually unfolds into a layered psychedelic journey.

"Ogres" is one of the key pieces from forthcoming album *Rites*, due for release on November 27 in a limited-edition LP, CD digipak, and digital formats. The single will also be available as a limited-edition 7-inch vinyl (500 copies), out September 25.

The first piece conceived for the album, "Ogres" was completed only at the very end of the recording process, the result of an extended period of development and refinement. Elemental, relentless, and hypnotic, it is built around a deeply ritualistic sonic identity. Rooted in an Ethiopian pentatonic scale, the composition began as a bass and percussion ostinato evoking a martial march before evolving into a dense groove infused with psychedelic and trip-hop textures. Its obsessive rhythm summons a twilight bestiary of dark, menacing creatures, building toward a tension-filled climax before dissolving into a hazy, dreamlike finale that suggests awakening or re-emergence.

Like the rest of *Rites*, the track began as a jam session and was recorded in stages: live takes of the core arrangements first, then dedicated sessions for synths, horns and overdubs. Marco Sirio Pivetti engineered at Metrò Rec Studio in Riva del Garda, Gio Solo at Sberdia Studio in Turin. Overdubs were reamped through tube amplifiers and analog outboard. The band co-produced with Pivetti, who also mixed; Riccardo Ricci mastered at Velvet Room Mastering Studio in Brighton.

Electric Circus are based in Turin. They released their debut album, *Canicola*, in 2018 and have toured the U.S. Scoring *Contrecourant* (2021), a documentary series shot in Senegal and Mali, led them to Sahel Roots, a duo from the north of the country. The two groups recorded *On est ensemble* (Mieruba, 2023) remotely between Turin and Bamako, each writing two pieces for the other to finish.
